(Sub-Fund of Spectra 2 Investment Funds (NURS) an Open Ended Investment Company)

Share Class: Net Income Shares

ISIN Code: GB0030366719

Authorised Corporate Director (ACD): Yealand Fund Services Limited

Objectives and investment policy

The investment objective is to achieve total returns over the long term (at least 5 years) through both capital growth and from income, through investment in some or all sectors in some or all world markets including the UK.

The investment policy for achieving the objective is to invest in transferable securities, bonds (both corporate and government debt securities) and collective investment schemes ("CIS"), money market instruments, deposits, derivatives and forward transactions (for hedging purposes) and gold if deemed appropriate to enable the pursuit of the investment objective.

The Fund is actively managed and has no limit to which it can be invested in each sector or asset type, nor is there any particular geographic focus. The Portfolio Manager has full flexibility to adjust the proportion of the property of the Fund depending on their view of market conditions and the assets which it believes are most likely to achieve the Fund's investment objective.

The Fund may invest in CIS which have different investment strategies or restrictions than the Fund, including the ability to invest in derivatives for investment purposes and to gain exposure to assets which are not expressly listed above. Investment in CIS will usually be limited to those which invest primarily in the assets listed above and without exception, CIS will only be held in so far as the rules permit the Fund to gain exposure to the assets held by those CIS.

A Glossary of Definitions which provides definitions to some of the technical language used in this document is available from www.yealand.com/policies.

The share class is ranked in risk category 5 as its price has experienced above average rises and falls historically.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. Investors are advised that the lowest category does not mean a risk free investment.

The risk indicator for this Fund reflects the following:

The value of investments in the Fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the Fund may increase significantly, and in addition, the Fund may be subject to the following risks.

Charges to Capital Account: 50% of the Annual Management Charge is charged to capital. This treatment of charges may increase the amount of income available for distribution, but may also constrain capital growth.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the Fund.

Currency risk: Even with the use of hedging techniques, changes in currency exchange rates could adversely affect Fund performance.

Default risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.
