

The YFS Collidr Multi-Asset Fund Factsheet

Reporting date: 31 August 2023

Investment Objective

The investment objective of the The YFS Collidr Multi-Asset Fund is intended to provide capital appreciation over the medium to long term (7 years plus) by investing in a diversified portfolio of assets.

Company Profile

Yealand Fund Services Limited is the Authorised Corporate Director (ACD) for the The YFS Collidr Multi-Asset Fund.

Fund Profile

To achieve the investment objective, the fund typically invests in a mix of assets including equities, bonds and currencies from anywhere in the world. The Fund may invest in these assets directly or indirectly. The fund aims to gain exposure to fixed income assets in a range of 0-60%, and in equity assets in a range of 0-40%. The remaining portion of the Fund's assets will be invested in money market instruments, cash, near cash and deposits.

Indirect investment in securities will be achieved by investing in Collective Investment Schemes ("CIS"), which includes regulated CIS, exchange traded funds, investment trusts, structured products (products which usually offer a fixed-term pre-defined return linked to the performance of a range of assets or indices) or derivatives, or a combination of each as permitted by this policy and the Regulations.

The Fund may utilise derivatives for investment purposes and to reduce the risks and costs of managing the fund.

The Fund may invest in CIS which are managed by the ACD, the Portfolio Manager or their associates. Investment in CIS will generally be directed toward funds which invest primarily in equities and debt securities, however the Fund may invest in CIS which have different investment strategies or restrictions to the Fund, including the ability to gain exposure to assets which are not expressly included in the policy.

The Fund is actively managed and has, with the exception of the above noted percentage ranges, no limit to which it can be invested in each sector or asset type, nor is there any particular geographic focus. The Fund may invest in Emerging Markets which are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. The Portfolio Manager has full flexibility to adjust the proportion of the property of the Fund depending on their view of market conditions and the assets which it believes are most likely to achieve the Fund's investment objective. From time to time the liquidity of the Fund may be increased substantially if judged to be in the interests of investors.

A Glossary of Definitions which provides definitions to some of the technical language used in this document is available from www.yealand.com under useful information.

Key Information

Risk Warning

The value of investments, and the income from them, may fall as well as rise, and is not guaranteed. Consequently an investor may not receive back the amount originally invested. Past performance is not a guide to future performance. Investments denominated in foreign currencies may be impacted by movements in the exchange rates and investments with fixed or floating interest rates by changes in prevailing rates or expectation of future rates. For further information on the Fund's risks please refer to the Risk section of the Prospectus and the Risk and Reward Profile of the Key Investor Information Document (KIID).
