YFS Knox Global Balanced Fund

(Sub-Fund of YFS Knox Investment Funds)

Share Class: Net Income Shares

ISIN Code: GB00BYZZBM62

Authorised Corporate Director (ACD): Yealand Fund Services Limited

FCA Sub-Fund Product Reference Number: 706422

Objectives and investment policy

The objective of the YFS Knox Global Balanced Fund is to seek to provide a balanced return between the provision of income and capital growth.

The investment policy by which the YFS Knox Global Balanced Fund will seek to achieve its objective is to invest mainly (at least 50%) in a diversified global portfolio of transferable securities (including, but not limited to, equities and bonds (both corporate and government debt securities)). The Fund may also invest in collective investment schemes ("CIS") (both regulated and unregulated structures), warrants, money market instruments, cash, near cash and deposits subject to the limits in the Prospectus. The Fund may borrow and may enter into underwriting arrangements as permitted in the Regulations. It is the ACD's intention that derivatives and forward currency transactions will only be used for the purposes of efficient portfolio management, including hedging.

The Fund is actively managed and has, with the exception of the above noted minimum, no limit to which it can be invested in each asset type, nor will emphasis be placed on a particular geographic, economic or industrial sector. The Portfolio Manager has full flexibility to adjust the proportion of the property of the Fund depending on their view of market conditions and the assets which it believes are most likely to achieve the Fund's investment objective. From time to time the liquidity of the Fund may be increased substantially if judged to be in the interests of Shareholders.

The Fund may invest in CIS which have different investment strategies or restrictions than the Fund, including the ability to invest in derivatives for investment purposes and to gain exposure to assets which are not expressly listed above. Investment in CIS will usually be limited to those which invest primarily in the assets listed above and without exception, CIS will only be held in so far as the rules permit the Fund to gain exposure to the assets held by those CIS.

Any income is paid half-yearly.

Target Market

The YFS Knox Global Balanced Fund shall be marketed to professional and institutional investors. A typical investor in the YFS Knox Global Balanced Fund will be seeking a balanced return between the provision of income and capital growth, will be in a position to benefit from the tax elected nature of the Fund (in particular pension funds and charities) and will have received advice from an appropriately qualified financial adviser. The ACD considers that the YFS Knox Global Balanced Fund is particularly appropriate for tax exempt investors who might need to access their capital in the long term (5 years plus). The YFS Knox Global Balanced Fund is unlikely to be compatible with the requirements of an investor:

- looking for a guaranteed return; or
- seeking full capital protection; or
- who does not have sufficient resources to bear any loss resulting from the investment; or
- who is not able to evaluate the risks and merits of the Fund; or
- with a short-term (less than five years) investment horizon.

Risk and reward profile

The share class is ranked in risk category 5 as its price has experienced above average rises and falls historically.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. Investors are advised that the lowest category does not mean a risk free investment.

The risk indicator for this Fund reflects the following:

The value of investments in the Fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the Fund may increase significantly, and in addition, the Fund may be subject to the following risks.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the Fund.

Currency risk: Even with the use of hedging techniques, changes in currency exchange rates could adversely affect Fund performance.

Default risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Charges to Capital Account: The ACD's annual management charge is charged to capital. This treatment of the ACD's fee will increase the amount of income available for distribution to Shareholders but may constrain capital growth.

Non-UCITS Retail Scheme Key Investor Information

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.

The Prospectus and shareholder reports are in English.

YFS Knox Global Balanced Fund is one sub-fund of YFS Knox Investment Funds, an “umbrella OEIC”. Where there is more than one Fund in an umbrella OEIC, each Fund is treated as a separate entity. On 21 December 2011 Statutory Instrument 2011 No. 3049 came into force, which had the effect of establishing a ‘protected cell regime’ for umbrella OEICs. The protected cell regime provides for the ring-fencing of sub-fund assets such that liabilities of one Fund may not be met out of the assets of another.
