YFS Whitman UK Small Cap Growth Fund (the "Fund")

Sub-fund of the YFS Whitman OEIC (the "Company")

Share Class: C Accumulation Shares (the "Class")

ISIN Code: GB00BMTM5166 (GBP)

Authorised Corporate Director (ACD): Yealand Fund Services Limited

Investment Objective and Policy

The investment objective is to achieve long term capital growth and to outperform the Deutsche Numis Smaller Companies (plus AIM ex Investment Companies) Index over rolling 5 year periods (after charges).

The Fund will be actively managed by investing at least 80% of the Fund in equities (shares) of UK smaller companies. These are shares of companies which are incorporated or domiciled in the UK or shares of companies that are listed in the UK and have the majority of their economic activity in the UK and which form the bottom 10% of the UK equity market by capitalisation. Investment may also be made in small companies which are listed, quoted or traded in the UK. The aim of the Fund is to identify companies that have good long-term growth potential. The predominant focus is on individual company analysis and selection, although economic conditions are also considered. The Investment Adviser places considerable importance on characteristics including (but not limited to) favourable underlying market structure and growth, strong margin profile, above sector average return on capital, strong cash generation, high levels of recurring revenue and considerable senior management equity ownership. The Fund may also invest in other transferable securities (including shares in mid and large cap companies, following the same investment philosophy, anywhere in the world), warrants, government and public securities. Up to 10% of the Fund's Net Asset Value may also be invested in units or shares of collective investment schemes (which may include collective investment schemes managed by the ACD or its associates). At times it may be appropriate for the Fund not to be fully invested but to hold cash and near cash.

A Glossary of Definitions which provides definitions to some of the technical language used in this document is available from www.yealand.com/policies.

Dealing frequency

Shares in the Fund may be bought or sold before 12pm on every business day.

Distribution policy

Any income this share class generates will be reinvested to grow the value of your investment.

Target Market

The Fund is suitable for an investor seeking to achieve capital growth over a minimum of 5 years. The Fund is unlikely to be compatible with the requirements of an investor:

- looking for a guaranteed return; or
- seeking full or partial capital protection; or
- who does not have sufficient resources to bear any loss resulting from the investment; or
- who is not able to evaluate the risks and merits of the Fund; or
- fully risk averse and have no or low tolerance for risk; or
- with an investment horizon of less than 5 years.

Risk and reward profile

The calculation of the risk and reward indicator is based on 5 years of historical (actual or simulated) information so may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not a target or a guarantee and may change over time. Investors are advised that the lowest category does not mean a risk free investment.

The risk indicator for this Fund reflects the following:

The value of investments in the Fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the Fund may increase significantly, and in addition, the Fund may be subject to the following risks.

Smaller Companies risk: Investments in smaller companies can involve more risk than investing in larger, more established companies. Shares in smaller companies are often not as easy to sell as shares in larger companies. This can cause difficulty in buying, valuing and selling those shares. Also, reliable information for deciding their value or the risks may not be available.

Performance risk: The performance and risk levels of the Funds will vary according to the investment strategy determined by the Investment Adviser's investment methodology and also the selection of instruments to implement this strategy and any currency overlay strategy.

Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.

Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.
